Aluminium

AL

Anodized aluminium poles are extremely robust, corrosion-resistant, and ideal for professional use, equipped with full-metal locks and a cushioned soft grip. Available in a wide range of base length. To ensure longer product life, clean and dry your poles when storing.

- Highly durable – anodized aluminium protects against corrosion, abrasion, and scratches for heavy-duty use
- Full-metal quick locks – strong and long-lasting clamps ensure a secure hold of all segments | micro adjustable
- Cushioned soft grip – outer tube covered for comfortable handling even in cold conditions
- Made in Germany – premium quality and precision

Carbon-Hybrid

CFK

The ultra-light carbon poles made from a glass fiber-carbon composite enable precise, fatigue-free work and are corrosion-resistant. As this is a sensitive fibrous material, it is more impact- and shock-sensitive, which the user must take into account. To ensure longer product life, clean and dry your poles when storing.

- Extremely light – only 1.3–2.0 kg | 2,9–4,4 lb, ideal for extended use
- High rigidity – minimal bending for precise work at any height
- Corrosion-resistant – durable and long-lasting material
- Strong locks – closures provide high clamping force
- Fatigue-free working thanks to low weight
- Carbon Fiber is a specially manufactured material. While this tool is light and durable, extra care must be taken to prolong the life of the pole.

Fiberglass

GFK

Fiberglass poles provide high rigidity, but are not isolated and are conductive. They are meant for tree work only and are not safe for work around powerlines. To ensure longer product life, clean and dry your poles when storing.

- Reinforced fiberglass tubes – stable and rigid construction
- Plastic locks with left-hand thread – adjustment tool included
- Built-in pinch protection – prevents finger injuries when retracting the pole

Aluminium.

Stability at
extreme heights

Very robust
metal fastener

Do you have any other ideas for new
and innovative ideas?

Write to us: innovation@bergertools.com

All BERGER poles are not insulated and therefore are conductive.
They are meant for tree work only and are not safe for work around powerlines. Approaching or contacting electric power lines with a pole and attachments may cause serious injuries or death by electrocution.

Working at heights of
up to 8 meters | 26 feet

Easy & quick changing
of attachments

75850 0,85 - 1,90 m | 2,7 - 6,2 ft
Alu190 | Climbing Aluminium pole, 3-parts
1,19 kg | 2,62 lb Ø 36 mm | 1,42 inch / 32 mm | 1,26 inch / 28 mm | 1,10 inch
